

Making a Push Switch.

1. Take two paper strips and lay one on top of the other to make a right angle.
2. Fold the strips over each other until you have made a paper spring.
3. Stick a rectangle of foil to the top of your paper spring, so that its edges hang over the sides.
4. Take two more pieces of foil and lay them on the table.

5. As you press down your push switch, the foil needs to meet to complete the circuit.
6. The symbol for a push switch looks like this:

Can you draw the circuit diagram for your new circuit, including the push switch?
